

H. pylori Tests

Presumptive Identification of H. pylori

HpFast™
Results in 24 hours

- Both HpFast and HpOne provide a positive control kit, a breakaway biopsy pick and spatula
- Bright blue easy-to-read positive indicator gives you a quick, timely result
- No need for unsafe use of a needle or syringe

HpOne™
Results in 1 hour

Everything you need to conduct a quick and accurate urease test for Helicobacter pylori gastritis identification. An actual biopsy is recognized as the most accurate method of detecting H. pylori bacteria. The clear benefits of HpOne™ and HpFast™ make them the gold standard in H. pylori testing.
