# ROTH NET® Standard Foreign Body Retriever

ROTH NET® Standard Foreign Body Retrievers are engineered with a strong, reinforced net material for extra security when passing the cricopharyngeus.

ROTH NET®  
Leading the  
way for 25  
years!

Features:

- Several specialised designs offer optimal retrieval Nets for unique situations
- Patented Net design delivers a flexible pouch, ideal for retrieval within the GI Tract
- ROTH NET® retrievers are ideal for the removal of round, blunt or otherwise hard to grasp foreign bodies, as well as polyps and food bolus fragments

“The ROTH NET® retriever is a device you can count on for consistent, superior performance”

Ordering Information

Product Code	Description	Catheter Diameter (mm)	Length (cm)	Net Size (cm)	Box Size
00711050	ROTH NET® Standard Foreign Body Retriever	2.5	230	3 x 6	5
00711052	ROTH NET® Standard Foreign Body Retriever	2.5	230	3 x 6	10
00711053	ROTH NET® Standard Foreign Body Retriever	2.5	160	3 x 6	5
00711162	ROTH NET® Standard Foreign Body Retriever Sterile	2.5	230	3 x 6	10
00711150	ROTH NET® Standard Polyp Retriever	2.5	230	3 x 6	5
00711151	ROTH NET® Standard Polyp Retriever	2.5	230	3 x 6	10

## ROTH NET® Mini Paediatric Foreign Body Retriever

The ROTH NET® Mini Paediatric Foreign Body Retriever is extremely effective for removing coins, watch batteries and a variety of other foreign bodies children tend to swallow which need urgent removal.

### Features:

- For use with gastroscopes that have a minimum 2.0mm working channel

### Ordering Information

Product Code	Description	Catheter Diameter (mm)	Length (cm)	Net Size (cm)	Box Size
00711057	ROTH NET® Mini Paediatric Foreign Body Retriever	1.8	160	2 x 4.5	5

## ROTH NET® Mini Polyp Retriever

The ROTH NET® Mini Polyp Retriever features a smaller net design, offering enhanced maneuverability and visualisation while retrieving polyps within the small confines of the colon.

### Features:

- Features a rounder snare shape that improves manoeuvrability and allows for a clear view during retrieval
- Contains memory points in the snare that enable the net to open to a full capacity and maintain a consistent shape during multiple uses

### Ordering Information

Product Code	Description	Catheter Diameter (mm)	Length (cm)	Net Size (cm)	Box Size
00711158	ROTH NET® Mini Polyp Retriever	2.8	230	3.5 x 2.5	10
00711159	ROTH NET® Mini Polyp Retriever Sterile	2.8	230	3.5 x 2.5	5

# ROTH NET® Maxi Foreign Body Retriever

Ideal for large foreign body removal, such as batteries and EMR specimens too large for any other sized retriever or polyp trap.

# ROTH NET® Enteroscopic Foreign Body Retriever

Ideal retrieval device for removal of excised polyps and foreign bodies, its unique net design offers a comfortable measure of safety and security during procedures. Extra-long 350cm catheter for use with enteroscopes.

Features:

- For use in gastroscopes with 3.2 mm accessory channel or larger

“Our line of ROTH NETS® offer a solution to both your common and unique retrieval challenges”

Ordering Information

Product Code	Description	Catheter Diameter (mm)	Length (cm)	Net Size (cm)	Box Size
00711059	ROTH NET® Maxi Foreign Body Retriever	3	160	4 x 8	5
00711165	ROTH NET® Maxi Foreign Body Retriever Sterile	3	230	4 x 8	5
00711152	ROTH NET® Enteroscopic Foreign Body Retriever	2.5	350	3 x 6	5

## ROTH NET® Platinum™ Universal Retriever

Capable of addressing a variety of retrieval needs, this robust retriever is an all-encompassing solution for foreign bodies, food impactions and polyp retrieval.

### Features:

- Larger capacity, ergonomic design and superior performance
- The spring-like memory points of the ROTH NET® Platinum™ series offers a retrieval net with a sturdier form which maintains its shape during multiple openings in lengthy procedures

### Ordering Information

Product Code	Description	Catheter Diameter (mm)	Length (cm)	Net Size (cm)	Box Size
00715050	ROTH NET® Platinum™ Universal Retriever	2.5	230	4 x 5.5	5
00715060	ROTH NET® Platinum™ Universal Retriever Sterile	2.5	230	4 x 5.5	5

## ROTH NET® Platinum™ Polyp Retriever

The ROTH NET® Platinum™ Polyp Retriever features a unique spring-like design, as well as more transparent mesh for easy visibility during retrieval.

### Features:

- An oversized retrieval pouch which offers increased net capacity for large and piecemeal resected polyps, as well as multiple polyp collection
- For use in scopes with a minimum 3.2mm working channel
- The spring-like memory points of the ROTH NET® Platinum™ series offers a retrieval net with a sturdier form which maintains its shape during multiple openings in lengthy procedures

### Ordering Information

Product Code	Description	Catheter Diameter (mm)	Length (cm)	Net Size (cm)	Box Size
00715150	ROTH NET® Platinum™ Polyp Retriever	3	230	4 x 5.5	5
00715160	ROTH NET® Platinum™ Polyp Retriever Sterile	3	230	4 x 5.5	5

# ROTH NET® Platinum™ Food Bolus Retriever

The ROTH NET® Platinum™ Food Bolus Retriever is designed specifically for the challenges encountered in food bolus removal. Its octagonal net is designed to open to maximum capacity while maintaining its form within the Oesophagus.

### Features:

- Featuring larger capacity, ergonomic design and superior performance
- Unique octagonal design to maintain shape and open to maximum capacity across multiple passes
- Spring-like action of the ROTH NET® Platinum™ series offers a retrieval net with a sturdier form and shape

“The food bolus was partially grasped and dislodged with the retrieval net. The net was then maneuvered to encircle the impaction. The food bolus was removed without any complication”

Professor Bennett E Roth M.D,  
David Geffen School of Medicine, UCLA

### Ordering Information

Product Code	Description	Catheter Diameter (mm)	Length (cm)	Net Size (cm)	Box Size
00711155	ROTH NET® Platinum™ Food Bolus Retriever	2.5	160	4 x 5.5	5

ROTH NET®  
PLATINUM™  
FOOD BOLUS  
RETRIEVER

### ROTH NET® PLATINUM™ FOOD BOLUS RETRIEVAL

Upper edge of the food impaction

Net partially opening while retracting the tip of the sheath

Encircling greater than 50% of the food bolus

ROTH NET and encased food bolus were slowly and completely withdrawn

ROTH NET® SELECT  
POLYP RETRIEVER

UNIQUE NETTING

For improved visibility  
throughout the procedure

## ROTH NET® Select Polyp Retriever

The ROTH NET® Select Polyp Retriever is designed specifically to retrieve excised polyps, tissue samples, foreign bodies and calculi during flexible and rigid endoscopy procedures.

### Features:

- Alternative weave design offers enhanced durability and strength for foreign body and food bolus retrieval
- Unique netting for improved visibility throughout the procedure
- Available in sterile or non-sterile options

“A more durable retrieval net able to perform across multiple passes during challenging procedures and improved visibility when retrieving targeted objects”

ROTH NET®

### Ordering Information

Product Code	Description	Catheter Diameter (mm)	Length (cm)	Net Size (cm)	Box Size
00711120	ROTH NET® Select Polyp Retriever	2.5	230	3 x 6	5
00711169	ROTH NET® Select Polyp Retriever - Sterile	2.5	230	3 x 6	5

## Talon™ Grasping Device

The Talon™ Grasping Device is specifically designed to provide the firm grip required for challenging food bolus and foreign body retrieval cases.

Featuring 4 stainless steel prongs with inward-facing atraumatic hooks, the Talon™ Grasping Device mimics the grasping capabilities of an Osprey Sea Hawk. Uniquely engineered, the device helps grip into the meat impaction or around the foreign body providing the strength required for a swift and safe retrieval. Compatible with Gastrosopes with a minimum 2.8mm accessory channel.

### The Talon™ Grasping Device is designed to remove:

- Meat impactions
- Food in the Oesophagus due to achalasia
- Foreign bodies

“Offering an extra hand in food impaction retrieval”

### Ordering Information

Product Code	Description	Sheath Diameter (mm)	Working Length (cm)	Box Size
00711175	Talon™ Grasping Device	2.5	160	5

# Raptor™ Grasping Device

The disposable Raptor™ Grasping Device offers the precision and strength needed during foreign body and stent retrieval.

Features:

- Hybrid jaw configuration, combines alligator and rat tooth capabilities into one device, increasing the gripping ability for a stronger hold
- Flexible distal wire operates in a retroflexed position and in ERCP scopes

# Raptor™ Mini Grasping Device

Features:

- A smaller hybrid jaw and catheter option for tight or torqued positions
- Specially designed for procedures requiring an ultra slim endoscope
- Offers the firm grip needed to retrieve smaller foreign bodies and stents

“Offering the precision and strength needed during foreign body retrieval”

Ordering Information

Product Code	Description	Sheath Diameter (mm)	Length (cm)	Jaw Opening (mm)	Jaw Length (mm)	Box Size
00711177	Raptor™ Grasping Device	2.4	230	10	6.6	5
00711178	Raptor™ Mini Grasping Device	1.9	200	7	4.6	5

## Falcon® Rotatable Retrieval Basket

The Falcon® Rotatable Retrieval Basket offers flexibility when retrieving long or oddly shaped objects such as toothbrushes, utensils and pens.

Features:

- Rotatable: enables the physician to capture objects easier
- Single-use: eliminates reprocessing and ensures consistent performance
- Three dimensional: allows the clinician to retrieve objects at any angle

Ordering Information

Product Code	Description	Sheath Diameter (mm)	Length (cm)	Basket Size (cm)	Box Size
00711141	Falcon® Rotatable Retrieval Basket	2.5	230	3.5 x 6.0	5

## SUREGRIP Rat Tooth Alligator Jaw Forceps

The SUREGRIP Rat Tooth Alligator Jaw Forceps is our ultimate grasping device combining superior grasping and grip capability into one premium product at an economy price.

The SUREGRIP features:

- Smooth catheter surface for optimal maneuverability
- Ideal for retrieving foreign bodies and plastic stents in the GI Tract

Ordering Information

Product Code	Description	Sheath Diameter (mm)	Working Length (cm)	Jaw Length (mm)	Box Size
SUREGRIP	SUREGRIP Rat Tooth Alligator Jaw Forceps	2.8	230	8.3	10

# eTrap® Polyp Suction Trap

Eliminate sifting through waste to locate your specimen. The eTrap® Polyp Suction Trap allows for quick and accurate retrieval, while safeguarding users from unnecessary exposure to biomaterials.

Features:

- 2 removable specimen strainers provide little or no biomaterial exposure
- Ability to collect multiple polyps with uninterrupted scope suction
- Clear design that cycles fluid into the main suction receptacle
- Magnifying window to easily visualize the collected specimen
- Measurement guide to simplify specimen sizing

“The eTrap® - designed by nurses for nurses”

Ordering Information

Product Code	Description	Box Size
ETRAP	eTrap® Polyp Suction Trap	25

# Suction Polyp Trap™

The Suction Polyp Trap™ allows for easy in-line installation with clear viewing, which allows for quick visual verification of polyp specimens.

Features:

- Four chamber indexing system - allowing for accurate identification of each polyp site
- Clear windows for better polyp identification which saves time when establishing whether the polyps are captured or not
- Four rotatable capture chambers - offering convenient collection whilst isolating each for identification and pathology study
- Whole device can be transported to pathology as there is no need for a separate histology pot

EASILY AND SIMPLY  
CONNECTS TO  
ENDOSCOPE

CLEAR  
IDENTIFICATION OF  
POLYPS

“For convenient retrieval and  
identification of endoscopically  
removed polyps”

Ordering Information

Product Code	Description	Box Size
00710202	Suction Polyp Trap™ Four Chamber Trap	12

## Catchchem™ Polyp Trap

The Catchchem™ Polyp Trap is designed to be attached easily between the colonoscope and suction port in order to capture small polyps.

### Features:

- 4 rotatable and removable numbered chambers for quick and easy tissue transfer
- Eliminate personal handling of tissue saving time and additional desecration
- Accurate polyp identification with 4 removable numbered chambers

### Ordering Information

Product Code	Description	Box Size
POLYP TRAP	Catchchem™ 4 Chamber Polyp Trap	10

## Instream® Polyp Trap

The InStream® Polyp Trap minimizes exposure to biomaterial and is a cost-effective alternative to single specimen and mucous traps.

### Features:

- Specimen screen to easily isolate and remove the polyp
- Removable screen filter for flow-through capability

### Ordering Information

Product Code	Description	Box Size
00711098	InStream® Polyp Trap	50

# Quick Catch™ In-Line Polyp Trap

The Quick Catch™ In-Line Polyp Trap allows for easy in-line installation and features clear plastic construction allowing for quick visual verification of polyp specimens.

Features:

- Unique design - offering a single chamber with flat surfaces allowing for easy gripping and handling
- Chamber size that fits easily into specimen jars - eliminating the need for specimen handling and transfer which removes the risk of damaging and / or contaminating the sample
- Clear window for better polyp identification which saves time when establishing whether the polyp is captured or not

“The Quick Catch™ In-Line Polyp Trap is a lower cost option without compromising on quality”

# Latex Hood Protector

A soft rubber hood to be used on distal end of most endoscopes in order to protect the cardiac sphincter, oesophagus and pharynx during removal of a foreign body via the endoscopic tract.

Features:

- Universal fit on any GI Scope
- Helps to protect the gastric cardia, oesophagus and posterior pharynx
- Contains natural latex
- Single use

Ordering Information

Product Code	Description	Box Size
00710201	Quick Catch™ In-Line Polyp Trap	50
10-02-007	Latex Hood Protector - Foreign Body Retrieval Hood	1

## Guardus® Overtube

The Guardus® Overtube is available in 25 and 50cm lengths and specifically developed for enhanced patient protection and safety.

The Guardus® Overtube system features an exclusive tapered tip design to protect against mucosal damage, while its unique insufflation cap helps maintain insufflation and guard against leakage of body fluids during use.

The Guardus® Overtube is designed to assist with the following endoscopic needs:

- Foreign body / sharp object extraction
- Stent removal
- Upper Endoscopic Mucosal Resection
- Gastroparesis and achalasia procedures
- Active upper GI bleed
- Procedures requiring multiple scope insertions
- Food bolus removal procedures
- 2 sizes to fit diagnostic and therapeutic gastroscopes
- 2 lengths to cater for oesophageal and gastric use

### Ordering Information

Product Code	Description	Length (cm)	Scope O.D. (mm)	Overtube O.D. (mm)	Overtube I.D. (mm)	Box Size
